FOLDER AGGREGATION
ADVANCED OPTIONS
Advanced Options
When this option is enabled, you can assign the folder and subfolder permission to individual users and user groups.
Enable Advanced Folder Permissions
Enable Windows ACL support
Note: When Windows ACL Support is enabled, you can only edit the folder and subfolder permission from Windows File Explorer. When Windows ACL Support is disabled, you can only edit the folder and subfolder permissions from the "Folder Permissions" icons in the "Shared Folders" tab from "Access Right Management" >> "Shared Folders"
